2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

☐ a sequence listing

☐ table(s) related to the sequence listing

b. format of material

☐ in written format

☐ in computer readable form

c. time of filing/furnishing

☐ contained in the international application as filed.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

1. ☒ The following document has not yet been furnished:

☒ copy of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(a)).

☐ translation of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(b)).

Consequently it has not been possible to consider the validity of the priority claim. This opinion has nevertheless been established on the assumption that the relevant date in the claimed priority date.

2. ☐ This opinion has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rules 43bis.1 and 64.1). Thus for the purposes of this opinion, the international filing date indicated above is considered to be the relevant date.

<p>The present invention relates to a synergistic fungicidal mixture of (I) and (II) according to claim 1. D1 (EP0988790) describes more general synergistic fungicidal compositions, there being several selection options for both constituents. The present invention is, however, encompassed in D1.</p> <p>None of the examples of D1 describes the claimed composition. The present application meets the criterion identified in PCT Article 33(2), because the subject matter of claims 1-10 is novel over the prior art circumscribed in the Regulations (PCT Rule 64.1-64.3).</p> <p>Since D1 discloses a plurality of examples with relatively minor differences in comparison with the present invention, the expectation <i>prima facie</i> would have been that the claimed composition would have a synergistic effect. Although synergy is considered fundamentally unpredictable, the skilled person would have garnered sufficient information from D1 to the effect that certain variations ought also to lead to the desired effect. compounds explicitly mentioned by D1. These experiments show unambiguously that the selection made in accordance with the invention not only permits the achievement of a synergistic effect but also an improved synergistic effect over the most similar compositions that can be inferred from D1. This improvement could not have been expected. The present application meets the criterion identified in PCT Article 33(3), since the subject matter of claims 1-10 involves an inventive step (PCT Rule 65.1-65.2).

The present application meets the criterion identified in PCT Article 33(4), since the subject matter of claims 1-10 is regarded as being commercially applicable.

It is assumed that all of the claims enjoy the priority right. Should it later emerge that this is not the case, the document cited below in Box VI might possibly be considered relevant for evaluating compliance with the criteria of PCT Article 33(1).
